Testimonials

a HUGE thank you for being our photographer for the Food Beverage Atlantic Conference and Awards!!! You fit right in with our team, LOVED your sense of humour, and you take AMAZING photos to boot!! I hope we get to work together again soon

- Jocelyn F, HOST Management

Allison did an amazing job! Showed up on time, took amazing photos in a challenging environment (two locations on a hot summer day) and even went out of her way to tell me when guests were heading the wrong way. Definitely the best value for your dollar you can get and she was very enthusiastic as well. Would hire again.

- Robert White, SS Atlantic 150 Anniversary/Blessing of the Boats

Thank you for your support with the joint homecoming of HMCS Montreal and HMCS Halifax. The photos that you took are absolutely beautiful. You really captured the joy of the day. Having well composed photos of the many different families and the fleet helps us to create meaningful content that they can relate to. We sincerely hope that we can work with you again at other homecoming ceremonies.

- Jennifer Landon, MFRC Military Family Navigators

We were absolutely delighted with the bright, candid photos Allison Smith took at the Social Media Day Halifax Conference. They gave us a unique perspective on our attendees, volunteers and speakers throughout the day - a behind-the-scenes, inclusive feeling. We're so glad to have these photos to look back on our successful event.

- Linda Daley, VP, Social Media Day Halifax Conference

Working with Allison from Dandelion Digital was a wonderful experience. Knowing that we were running on a tight timeline ourselves, she was incredibly accommodating fitting us into her schedule. On the day of our shoot Allison's years of experience were evident, she knew exactly the shots we were hoping to capture of our products, and was willing to spend several hours in the hot sun to ensure that she got them for us. Her turn around time on getting us the edited photos was also swift and impressive, and provided us with plenty of beautiful shots to pick from. We can't wait to work with her again.

- MacFarlands Events, A Division of Chair-Man Mills

Why Allison

At the core of all Event Photography is COMMUNITY.

Live event photography is about conveying the excitement, the pride, and the interaction of your community or business. As a professional photographer I have nearly 30 years experience in event photography.

I am Allison, photographer and founder of Dandelion Digital. I first studied photography in high school, where I fell in love with the darkroom. After high school, I was living overseas, on military posting with my father, where I took my first real job as a photo tech with the military. This gave me the best education, experience, and cemented my photojournalistic style.

While overseas I met and married a Caper. On returning to Canada we lived in Manitoba, where I took a college certificate in Media Production, and worked in a darkroom for a wedding studio.

Posted to Alberta, I started a "side hustle" photography business focusing on weddings & families. As film turned to SD cards, I returned to college to get a certificate in Digital Imaging.

Careers took me from the local newspaper, radio station, Chamber of Commerce, and finally an event services company. The experiences all had a common thread. Photography & social media of community events.

When I arrived in Nova Scotia in 2019, I returned to college for a social media certificate.

Dandelion Digital launched in 2020 with a business plan around events. Over 30 years my photography has taken me from a General's Inspection on a tarmac, to craft beer festivals in the mountains. From Business Awards & Galas, to a Premier's speech at an Oil & Gas Conference. Not to mention the music festivals, trade shows, parades, and so much more!

It is thrilling to have live events back in full force, and I look forward to yours.
